COMPANY OVERVIEW

First State Manufacturing is about **solutions**. That's why we make it our job to understand what our valued customers want, and that's why we listen more than we talk. We define "success" as helping our customers to become more successful. And that's just what happens when your overhead costs are lowered through "value-added" seating and textile products and services. With over 50 years of experience in a wide range of diverse industrial upholstery fields, we can supply cost-effective solutions to even your most difficult design challenges.

First State Manufacturing can provide the textile products you need for all aircraft: small or private planes, larger corporate aircraft, and all military aircraft. We offer a wide selection of fabrics and materials that meet or exceed all necessary FAA fire retardancy requirements, and we're known for our ability to custom manufacture seat covers & cushions, carpeting, wall panels and even curtains to meet your needs.

Our customers count on us to reupholster existing seating, or to custom cut and bind carpet and quilted insulation blankets & panels according to their unique specifications and drawings. And our customers know that if they're experiencing premature failure or improper fit with their current product, our sales and design staff will go the extra mile to providing cost-effective solutions they can count on. The result? Increased efficiency, improved durability, and products that even outlast original designs! And remember, volume discounts are also available.

Humbly speaking, our reputation precedes us. Our government customers view us as their supplier of choice for seat cushions & covers, arm rests & head rests, engine covers, aircraft ground service covers, insulation blankets, upholstery and various textile assemblies, bags & pouches.

Our seasoned artisans provide the kind of expertise that allows us to rest on our promise of superior service at affordable prices.
